FIRDOSH KHAN

Full Stack Developer | MERN · Next.js · PostgreSQL ·

+91-7979009875 · thefirdosh@gmail.com · GitHub · LinkedIn · Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer skilled in MERN Stack, Next.js, PostgreSQL, TypeScript, and modern web technologies. Passionate about building complete web applications, handling both frontend and backend development, and creating scalable, user-focused solutions. Experienced in working with APIs, databases, authentication, and AI-powered applications using LLMs, RAG, and LangChain.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), SQL, HTML5, CSS3
Frontend	React.js, Next.js, Tailwind CSS, SCSS, Redux Toolkit, TanStack Query, Responsive Design, SSR,
Backend	Node.js, Express.js, Hono.js, REST APIs, JWT, OAuth2, RBAC, Middleware, Input Validation,
Database	MongoDB, PostgreSQL, Prisma ORM

PROJECTS

CareerPilot AI | *MongoDB · Express.js · React.js · Node.js · LLMs · RAG · Puppeteer · SCSS* **↗ Live Demo**

- Built an AI-powered resume and interview preparation platform using LLMs, RAG pipelines, and LangChain to semantically match resumes against job descriptions with skill-gap analysis.
- Developed a resume-to-JD matching engine computing semantic similarity scores, identifying missing keywords, and generating actionable improvement suggestions to boost ATS pass-through rates.
- Implemented an automated, role-specific interview question generator using prompt engineering based on candidate resume and target job description context.
- Integrated Puppeteer for server-side dynamic PDF generation, producing ATS-optimized, job-tailored resume exports; deployed serverless APIs on Vercel with MongoDB Atlas.

Interviewlyyy | *React.js · Node.js · Express.js · MongoDB · Clerk · Stream SDK · TanStack Query · Piston API* **↗ Live Demo**

- Built a full-stack real-time mock interview platform with live video calls, collaborative code editor, in-browser chat, and screen sharing using Stream SDK and WebSocket connections.
- Implemented secure authentication via Clerk with OAuth providers (Google, GitHub), RBAC, and protected route middleware ensuring zero unauthorized access in production.
- Integrated Piston API for multi-language in-browser code execution with syntax highlighting and real-time output rendering, supporting 5+ programming languages.
- Optimized client-side data fetching with TanStack Query caching and background refetching, reducing redundant API calls and improving UI responsiveness by ~40%.

StudyNotion | *React.js · Node.js · Express.js · Redux Toolkit · MongoDB · Razorpay* **↗ Live Demo**

- Built a production-ready e-learning marketplace enabling instructors to create/manage courses and students to enroll, track progress, and consume multimedia content.
- Designed REST APIs for course management, enrollment, content delivery, and user workflows with JWT auth, refresh token rotation, OTP email verification, and password reset.
- Integrated Razorpay payment gateway with webhook handlers for real-time payment verification, order management, and automated transactional email notifications via Nodemailer.
- Managed application state across 50+ React components using Redux Toolkit with normalized data structures, selectors, and optimistic UI updates for seamless UX.

EDUCATION

Bachelor of Technology – Computer Science & Engineering *2022 – 2026*

CGPA: 7.8/10 | 12th: 84.4% (2022) | 10th: 82.4% (2020)
